RGB CCT DIM 3 in 1 Zigbee Remote
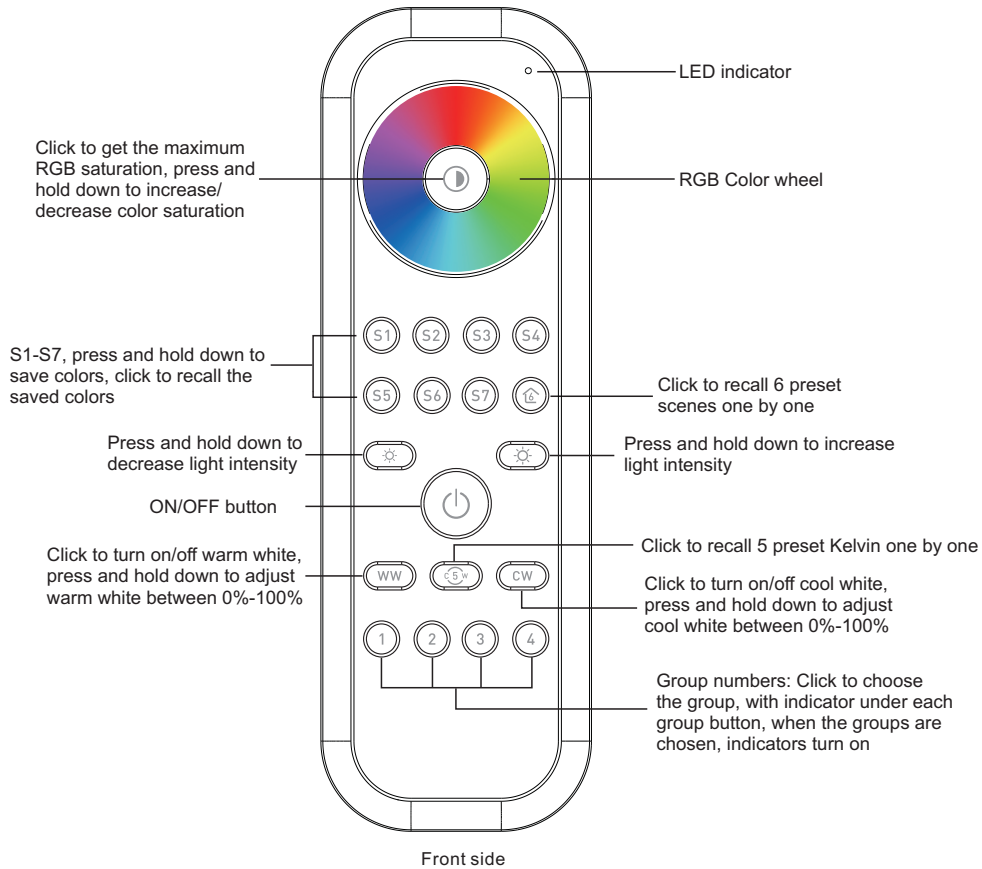

70100032

Important: *Read All Instructions Prior to Installation*

Function introduction

Click to get the maximum RGB saturation, press and hold down to increase/decrease color saturation

LED indicator

RGB Color wheel

S1-S7, press and hold down to save colors, click to recall the saved colors

Click to recall 6 preset scenes one by one

Press and hold down to decrease light intensity

Press and hold down to increase light intensity

ON/OFF button

Click to recall 5 preset Kelvin one by one

Click to turn on/off warm white, press and hold down to adjust warm white between 0%-100%

Click to turn on/off cool white, press and hold down to adjust cool white between 0%-100%

Group numbers: Click to choose the group, with indicator under each group button, when the groups are chosen, indicators turn on

Front side

6V(2*CR2032 battery)

Note:Before the first use, please remove the protective film on the battery.

Bottom side

Product Data

Protocol	ZigBee 3.0
Operation Voltage	6V(2*CR2032 battery)
Transmission Frequency	2.4GHz
Transmission Range (free field)	30m
Dimming Range	0.1%-100%
Dimension	137x45x13mm
Protection Grade	IP20

• ZigBee RGB+CCT+DIM remote based on ZigBee 3.0

• High sensitive & high stable touch color wheel, fast & precise color control

• Battery powered remote with low power consumption

• Enables to pair ZigBee lighting devices through touchlink commissioning

• Supports find and bind mode to pair with ZigBee lighting devices

• Supports 4 groups for binding max. 30 lighting devices

• With 6 preset scenes, 5 preset Kelvin, enables to save and recall 7 scenes

• Enables to adjust RGB color saturation

• 2.4 GHz global operation

• Transmission range up to 30m

• Compatible with universal ZigBee Gateway products

• Enables to bind and control universal DIM, CCT, RGB, RGBW and RGB+CCT zigbee lighting devices

ZigBee Clusters Supported by This Remote Are As Follows:

Input clusters:

• Basic　　• Power Configuration　　• Identify　　• Diagnostics

Output clusters:

• Identify　　• Group　　• Scene　　• On/off　　• Level control　　• Ota　　• Color control

Safety & Warnings

• This device contains button lithium batteries that shall be stored and disposed properly.
• DO NOT expose the device to moisture.

Operation

1.This ZigBee remote is a wireless transmitter that communicates with a variety of ZigBee compatible systems. This transmitter sends wireless radio signals that are used to remotely control a compatible system.

2.This ZigBee remote supports 4 groups for binding max. 30 lighting devices and enables to control DIM, CCT, RGB, RGBW and RGB+CCT zigbee lighting devices.

3. Zigbee Network Pairing through Coordinator or Hub (Added to a Zigbee Network)

Step 1: Remove the remote from previous zigbee network if it has already been added to it, otherwise pairing will fail. Please refer to the part "Factory Reset Manually".

LED indicator

Step 2: From your zigbee controller or hub interface, choose to add device or accessory and enter Pairing mode as instructed by the controller.

Step 4: Immediately short press to search nearby network, indicator flashes every 1 second, 20 seconds timeout if there is no network. Indicator will then blink 5 times quickly for successful pairing.
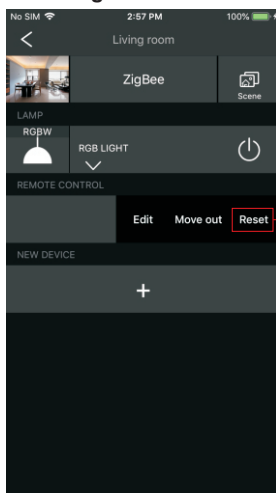

**Step 3:** Press and hold down until LED indicator turns on.

Note: 1) After pairing successfully, the remote information will appear on the controller or hub interface.
2) No remote information will appear on the hub interface if pairing to Philips Hue Bridge.

5. Removed from a Zigbee Network through Coordinator or Hub Interface

From your ZigBee controller or hub interface, choose to delete or reset the remote as instructed, indicator flashes 3 times quickly to indicate successful removing.

6. Factory Reset Manually

LED indicator

Note: All configuration parameters will be reset after the remote is reset or removed from the network.
Step 1: Press and hold down until LED indicator turns on.

Step 2: Immediately short press 5 times continuously, indicator flashes 3 times quickly to indicate successful reset.

4. TouchLink to a Zigbee Lighting Device

LED indicator

Step 1: Set the zigbee lighting device to start TouchLink commissioning, please refer to its manual to learn how.

< 10cm

ZigBee Lighting Device

Step 2: Bring the remote within 10cm of the lighting device.

Step 3: Press and hold down any group button to start TouchLink commissioning of the remote. LED indicator flashes fast for 3S, then flash 6 times slowly to indicate successful pairing to the device and the light connected to the device will blink twice.

Note: 1) Directly TouchLink (both not added to a ZigBee network), each remote can link with 30 devices.
2) TouchLink after both added to a ZigBee network, each remote can link with max. 30 devices.
3) For Hue Bridge & Amazon Echo Plus, add remote and device to network first then TouchLink.
4) After TouchLink, the remote can control the linked lighting devices.

7. Remove a Touchlink Paired ZigBee Lighting Device

LED indicator

Step 1: Set the Touchlink paired zigbee device to start TouchLink commissioning, please refer to its manual to learn how.

< 10cm

ZigBee Lighting Device

Step 2: Bring the remote within 10cm of the lighting device.

Step 3: Short press the group button that the device was linked to.

Step 4: Press and hold down until LED indicator turns on.

Step 5: Immediately short press twice to start TouchLink removing of the remote. LED indicator flashes fast for 3S, then flash 6 times slowly to indicate successful removing.
8. Factory Reset a Lighting Device (Touch Reset)

LED indicator

Step 1: Set the Touchlink paired zigbee device to start TouchLink commissioning, please refer to its manual to learn how.

< 10cm

ZigBee Lighting Device

Step 2: Bring the remote within 10cm of the lighting device.

Step 3: Press and hold down until LED indicator turns on.

Step 4: Immediately short press 5 times to start Touch Reset of the remote. LED indicator flashes fast for 3S, then flash 3 times slowly to indicate successful reset.
Note: the device shall be added to a network, the remote added to the same one or not added to any network.
9. Find and Bind a Zigbee Lighting Device

Note: Make sure the device and remote already added to the same zigbee network.

Step 1: Start find and bind mode on the Zigbee lighting device (initiator node) and enable it to find and bind target, refer to its manual.

LED indicator

ZigBee Lighting Device

Step 2: Short press a group button that you would like to bind the device to.

Note: Each remote can bind max. 30 lighting devices.

Step 3: Press and hold down until LED indicator turns on.

Step 4:Short press to enable the remote (target node) to find and bind initiator. LED indicator flashes 4 times for successful binding or twice if binding fails.

## 10. Find and Unbind a Zigbee Lighting Device

Step 1: Start find and bind mode on the ZigBee lighting device (initiator node) and enable it to find and unbind target, refer to its manual.

LED indicator

ZigBee Lighting Device

Step 2: Short press the group button that the device already bound to.

Step 3: Press and hold down until LED indicator turns on.

Step 4:Short press twice to enable the remote (target node) to find and unbind initiator. LED indicator flashes 4 times for successful unbinding or twice if unbinding fails.
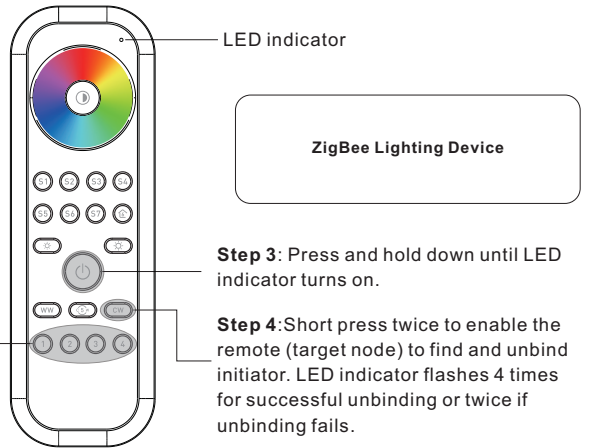

11. Clear All Find and Bind Mode Paired Lighting Devices of a Group

LED indicator

Step 1: Short press to choose the group that you would like to unbind all devices.

Step 2: Press and hold down until LED indicator turns on.

Step 3:Short press 5 times continuously to clear all bound lighting devices with this group. LED indicator flashes 4 times for successful unbinding.

12. Setup a Network & Add Devices to the Network (No Coordinator or Hub Required)

LED indicator

Step 1: Factory reset the remote and the lighting device, refer to their manuals.

< 10cm

ZigBee Lighting Device

Step 2: TouchLink the remote and device to setup a network, refer to their manuals.

Step 3: Press and hold down until LED indicator turns on.

Step 4: Short press to enable the network to discover and add devices, LED indicator will flash twice. 180 seconds timeout, repeat the operation.

Step 5:Set another remote into network pairing mode and pair it to the network, refer to its manual.

Step 6: Add more remotes to the network as you would like.

Step 7: Factory reset the lighting devices that you would like then add them to the network, refer to their manuals.

Step 8: Touchlink to pair the added remotes and lighting devices, refer to their manuals. Each remote can link with max. 30 lighting devices. Each lighting device can be linked by max. 30 remotes.

13. OTA

The remote supports firmware updating through OTA, and will acquire new firmware from zigbee controller or hub every 10 minutes automatically.

14. How to Check Whether the Remote Belongs to a Network or not

Short press any other buttons except group buttons, indicator blinking means the remote has already been added to a network, no blinking of indicator means the remote does not belong to any network.

15. Battery Power Monitor Function

The remote will report battery power value to the coordinator under following situations:

• When powered on.

• When operating the switch to send data packets (over 4 hours since last operation).

• When added to the network by a coordinator.
